INSTALLATION INSTRUCTIONS

ROD UP - Model RUPC - For SUV’s, Wagons and Vans

Please read these instructions carefully

• Make sure the suction cups and windows are clean before attaching

• Do not place suction mounts on the applied resistive conductors (defoggers) or antennae on the glass. Doing so will prevent a vacuum from forming

• Check and secure all connections before driving

• Maximum weight capacity: 15 lbs. / 7kg

• Suction mounts should be re-set at least every 2 weeks

• Phillips screwdriver may be required, see section B of the installation instructions

Please Note:

It will be very helpful to have an idea of where you want the rod holders to be positioned on the rear tube assembly before assembling to your vehicle. Depending on the width of your vehicle, some or all of the rod holders can be positioned on the small tube, narrower vehicles may require that some of the rod holders be positioned on the small and large tubes.

We recommend that you first layout the tube assembly on the floor in the back of your vehicle to get an idea of which tube(s) the rod holders will be positioned:

- Do you want the rod holders above or below the tubes?
- Rod holders can be positioned above and below the tubes if required

If all the rod holders can be positioned on the small center tube, proceed to the section A.

If some of the rod holders need to be positioned on the larger tubes, proceed to section B.
SECTION A - ASSEMBLING REAR ASSEMBLY

1. Position Rod Holders (3) onto Telescopic Tube (1)

2. Insert Telescopic Tube (1) into each Dovetail Tube Assembly (2)

3. Loosen wing nut on suction mount

4. Attach one suction mount to rear side window. Be sure suction cups and windows are clean. Apply pressure to the suction mount against the window. Be sure to press the PRESS button down firmly while flipping the lever up.

5. IMPORTANT! Do not place suction mounts on the defog resistive conductors. The conductors, if applied on the window, will prevent the suction mounts from maintaining a vacuum.

6. Tighten wing nut

7. Attach opposite suction mount and tighten wing nut

8. Adjust Telescopic Tube (1) as required and re-position Rod Holders (3) if necessary. Tighten all 4 Thumbscrews (4)
1. If positioning the Rod Holders (3) topside of the Dovetail Tube Assembly (2), it is possible to slide the Rod Holders from the Suction Mount end, proceed to step 4.

2. To position Rod Holders (3) below the tube, remove the Tube Stop (requires philips screwdriver). Slide Rod Holders on and replace Tube Stop.

3. Insert Telescopic Tube (1) into each Dovetail Tube Assembly (2).

4. Attach one suction mount to rear side window. Be sure suction cups and windows are clean. Apply pressure to the suction mount against the window. Be sure to press the PRESS button down firmly while flipping the lever up.

5. Attach opposite suction mount and tighten wing nut.

6. Adjust Telescopic Tube (1) as required and re-position Rod Holders (3) if necessary. Tighten all 4 Thumbscrews (4).

7. IMPORTANT! Do not place suction mounts on the defog resistive conductors. The conductors, if applied on the window, will prevent the suction mounts from maintaining a vacuum.
ASSEMBLING TIP HOLDER ASSEMBLY

1. Determine which headrest you want to use and the appropriate Dovetail Tube - Vertical, long (5) or short (6)

2. Install Adapter (8) to the correct Dovetail Tube - Vertical

3. Lift headrest to its fullest height

4. Attach Horizontal Assembly (10) to headrest posts and engage clamps

5. Tighten clamp thumbscrews securely

6. Readjust headrest height

7. Flip lever lock up and pull out the telescopic tube to desired position

8. Slide Half-Wrap Tee (9) onto the Dovetail Tube - Vertical
ASSEMBLING TIP HOLDER ASSEMBLY

9. Slide Foam Tip Holder (7) onto Adapter (8)

10. Install Half-Wrap Tee (9) over extended Horizontal Assembly (10) securely

11. Adjust height of Dovetail Tube - Vertical and tighten Thumbscrew (11)

*Please Note:*

The tip holder can be adjusted horizontally and vertically for maximum passenger room.
1. Adjust the rubber tension bands on the Rod Holders (3) for maximum security

2. Adjust the Foam Tip Holder (7) height for easy loading

3. Place rod grip in Rod Holder (3)

4. Position rod tip into Foam Tip Holder (7) slots

5. Before driving, adjust tips in Foam Tip Holder (7)

6. Re-position Foam Tip Holder (7) toward ceiling for maximum passenger room

7. Tighten Thumbscrews (11)
The above images show just a few of the possible positions for the rod holders on the rear tube assembly. You may want to position the rod holders to accommodate your vehicle for optimum usage. Additional rod holders are sold separately.
**Warranty:**

RodMounts warranties our product against defects in materials or workmanship for one year from the date of purchase. This warranty applies to the original purchaser; proof of purchase is required. This warranty specifically excludes damage caused by failure to follow instructions, misuse, abuse, improper storage or use in a commercial application. No warranty of merchantability or fitness for a particular purpose is made. In the event of a claim against this warranty, the manufacturer’s obligation, and the claimant’s sole remedy, shall be replacement of the product, repair or refund of the original purchase price, at RodMounts’ option.

**Disclaimer:**

Handling, storage and use of this product by the buyer or user are beyond the control of RodMounts. Risks such as ineffectiveness or other unintended consequences resulting from, but not limited to, failure to follow instructions will be assumed by the buyer or user. In no case will RodMounts be held liable for consequential, special or indirect damages resulting from the improper handling, storage or use of this product.
